

## Age

The age distribution for Hawaii County is generally similar to the City and County of Honolulu, Maui County and Kauai County, according to the U.S. Census, 2010 (see Figure 13).

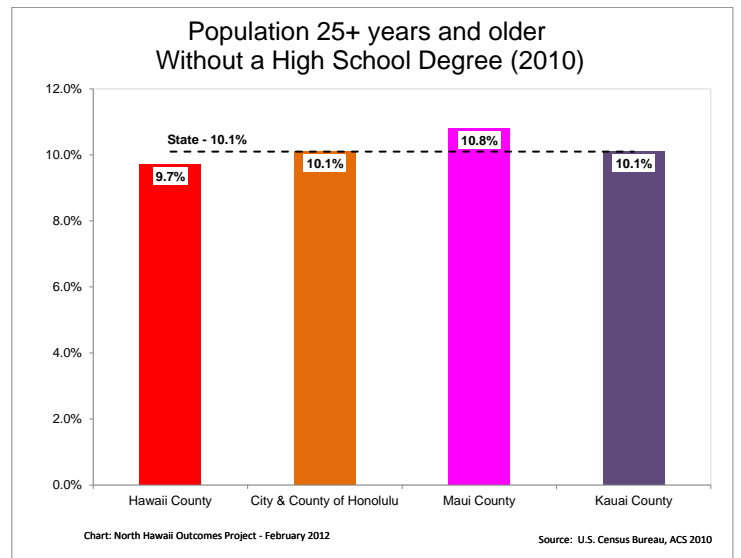

Figure 13

## Hawaii County Fewer Without a High School Degree

Hawaii County has a slightly lower rate of the population without a high school degree compared to the state, according to the American Community Survey 2010 data (see Figure 14). Although this indicator for Hawaii County is better than the other counties, Hawaii County is lower than the other counties for population with some college (see Figure 15).

Figure 14

## Hawaii County Fewer with Some College

Hawaii County has a slightly lower rate of the population with some college but no degree compared to the state rate, according to the American Community Survey 2010 data (see Figure 15).

Additional data is needed to compare the proportion of population with some college by districts within Hawaii County.
